

Regional Supervisor, Quality

Currently, an exciting opportunity exists in the role of Regional Supervisor, Quality. Reporting to the Manager of Quality, the Quality Supervisor is responsible for daily operations, supervision of staff and a variety of administrative tasks related to the design, implementation, maintenance and improvement of the CLS quality management system.

The ideal candidate will have proven leadership abilities, strong analytical and investigative skills, and the ability to apply change management skills when necessary. The candidate will be a CSMLS certified Medical Laboratory Technologist with ACMLT registration coupled with 5 – 8 years of previous supervisory experience. An in depth knowledge of applicable regulatory, accreditation and laboratory standards is required. Previous experience in the areas of budget management, labour relations and extensive communication would be essential.

Calgary Laboratory Services employs approximately 1700 employees, and is committed to providing quality of work life initiatives, meaningful work, leading edge technology and education incentives for our employees. In addition, CLS offers a progressive compensation and benefits plan, including relocation assistance.

Please forward your resume on or before March 26 2008, quoting tracking number 08-173 the Human Resources via Fax at (403) 770-3297 or online at jobs@cls.ab.ca no later than 4pm on the closing date.
